

The Claude Starter Kit

Claude is a tool. This kit makes it YOUR tool. Everything you need to set Claude up for your business in one place: templates, prompts, workflows, and strategies you can use today.

What it is

A free, copy-paste starter pack that takes you from "I have a Claude account" to "Claude runs real work for my business." No fluff, no theory. Six short files, each one a working asset. Grab the one you need and start.

What's inside

File	What it gives you
01 - Claude.ai Quickstart	Set up Claude.ai (web) with custom instructions in 15 minutes
02 - Claude Code Quickstart	Set up Claude Code (the terminal AI) with a CLAUDE.md file
03 - Custom Instruction Templates	8 copy-paste templates by business type. Grab the one that fits
04 - Prompt Library	30 ready-made prompts for common business tasks. Instant value
05 - Workflow Templates	6 SOP templates built on the WAT framework (Workflows, Agents, Tools)
06 - Strategies & Patterns	Advanced moves to get production-grade output, not generic answers
Bonus - Single-Prompt Video	One master prompt that turns a topic into a full faceless video package

What it does for you

- **Cuts the setup learning curve to one sitting.** You stop guessing and start with a configured Claude.
- **Turns prompts into assets.** The library and templates are reusable, not one-off chats.

- **Gives you a repeatable system.** The WAT workflow SOPs make Claude reliable, not just impressive.

Where to start

- **New to Claude?** Open 01 - Claude.ai Quickstart. You will have a personalized setup in 15 minutes.
- **Want prompts right now?** Go straight to 04 - Prompt Library. Copy, customize, run.
- **Technical builder?** Start with 02 - Claude Code Quickstart. That is the power tool.

Claude.ai vs Claude Code (the 10-second version)

- **Claude.ai (web):** chat for writing, research, and analysis. No code needed.
- **Claude Code (terminal):** reads and edits your files, runs scripts, builds software. The game-changer once you are building.

Many members use both. The kit sets up each one.
